

HAND WASHING PREVENTS ILLNESS !

How to set up safe hand washing for homes or temporary food stands that do not have running water.

Supplies List:

- water container with on/off nozzle
- liquid soap
- paper towel
- bucket to catch the dirty water

Caution: Small children can drown in large buckets with only a few inches of water in the bottom. So if you have small children in your home, you need to empty this bucket after each use. In addition, it is safer if you use a smaller bucket which is not very deep.
